Mrs. Warnock's Class

Grade 3

February Review

We are amazed at all the doors that are opening up since we learned our times tables. We cannot divide nor do fractions without knowing our facts. The best part of Social Studies was learning about the Industrial Revolution and making an edible car on the assembly line. We also learned about physical and chemical changes in science by making butter. Yum, yum!

Looking Ahead

- We will be learning about immigration in Social Studies, Holy Week in Religion, and will continue division in math

Reminders

- Don't forget to send in school supplies for our Back to School Basket for Tricky Tray

Birthdays

- March 10
Damani Bennett
- March 12
Konrad Wiklinski

High Fives

- To Grade 3, great job on the Terra Novas
- To Marcus Versailles our Student of the Month
