

Soaring to New Heights

High Five Student of the Month

Dawn Gergich

Classroom News

Oh my, the fun this month in Language Arts by learning interjections and correlative conjunctions. They can use these Language Arts skills to talk about the exciting things they learned about our nations roots such as the Articles of Confederation and the Constitution. Perhaps you can ask your child to recite the Preamble to the Constitution and begin a discussion about what these means to your family.

In Science we are gearing up to learn about the eight planets of our solar system and write a letter to the IAU (International Astronomers' Union) about our feelings on their decision to demote Pluto as a planet.

Want to know how much you will save if they take 20% off those shoes or sneakers at the local store? Ask your child to help you since we are learning percents. They will be able to let you know how much you will save! After percents, we will enter the world of geometry.

Happy Birthday to:

Andrew Youn	20
Diana Disu	26
Jean Charles	27

Up Coming Events

- ◆ March 12 St. Patrick's Day Dance
- ◆ Report Cards
- ◆ Liberty Science Center Trip TBA
- ◆ Notebooks Graded week of March 8-12
- ◆ St. Patrick's Day No School March 17
- ◆ Easter/Spring Vacation April 1

Grade 7 Rocks!

- * High Five to grade 7 parents that all came together to make the Mardi Gras a great success!
- * High Five to grade 7 for working together to remind their classmates to come on time for Mardi Gras
- * High Five to grade 7 students who are in the spring play.

- ◆ Ask your child what they are learning in school and don't be afraid to ask how you can help.
- ◆ When studying for math students should practice the steps with various sample exercises. Even using exercises they have already done can be helpful, since the process is similar only the numbers use change.
- ◆ Help study with your child by creating questions from the text or have the summarize what the learned that day in school for a subject.
